

# PVO Pergolas

## Image Gallery

Distributed generation PVO Pergolas can complement roof-mounted solar collectors with *well ventilated PV*.

Solar collecting modular pergolas can help create cooling places with the shade of PV and flowering plants. Specialty PV cells and panels can add delightful possibilities.

Additional PV aperture is possible with comprehensive site design and PV pergolas.

Well vented PVO Pergolas can be installed to the north of buildings, in gardens, above porches and decks, and up near the treetops.
